KEY SKILLS SUMMARY

- Software Development
- Collaboration
- Accuracy and Attention to Detail
- Teamwork
- Self-Development
- Adaptability to Emerging Technologies

ARJUN ARANETA

JAVA DEVELOPER/PROGRAMMER

PERSONAL PROFILE

To pursue a successful career in software design and development where skills in coding, bug fixing, and testing are used to deliver customers' needs.

WORK EXPERIENCE

Java/Intermediate Applications Developer

Telus International Philippines | May 17, 2021 - December 31, 2023

Has the responsibility of analyzing user requirements and development objectives, identifying application features and functions, developing applications to new and existing Java applications.

Duties:

- Analyze User Requirements to determine application design
- Attend scrums and daily meetings with development and business teams
- Aligning application design with business goals
- Developing and testing software
- Debugging existing code deployed in production
- Supporting other teams to ensure counterparts are well-informed to reduce defects
- Supporting counterparts during release and deployment.

Technologies: Java 8, Oracle Database, MySQL, JavaScript, PHP

Java Developer

KR Solutions/Racami LTD | Jan 7, 2019 - May 7, 2021

Mainly focused on developing and maintaining features for the solutions provided by the company based on business analysts and clients' requirements.

Duties:

- Attend daily calls/hangouts for updated tasks distribution and schedule
- Develop new features for the current workflow management system.

- Investigate and perform bug fixing.
- Code refactoring and making sure codebase and standard will be maintained.
- Maintain and develop scripts for the SQL database.

Technologies: Java 8, OpenJDK 11, MSSQL, MySQL, SQL Lite, JavaScript, PHP, Hibernate, NodeJS, AngularJS, .Net Framework

Java/Solutions Developer

PCCW Solutions | Feb 5, 2018 - Dec 28, 2018

Has the role of developing the Java based software based on the specifications, investigating and fixing bugs, and reporting to the immediate lead and manager.

Duties:

- Develop scripts for the modules based on the specifications.
- Investigate and fix bugs which are reported and encountered.
- Perform Regression Testing, Smoke Testing and Unit Testing of modules.
- Perform development of back end scripts based on requirements.
- Deliver on-time with the standard quality of code based on the current code base.

Technologies: Java 8, MSSQL, JavaScript, Hibernate

PHP/Wordpress Developer, .Net Developer

Freelance Projects | Jan 2013 - Dec 2017

Responsible for developing dynamic websites and web applications using PHP or .Net based technologies, integrating MySQL databases and web services, troubleshooting technical issues, optimizing applications for speed and scalability, and collaborating with teams to deploy new features while ensuring thorough testing, debugging, and documentation.

Duties:

- Utilize PHP, HTML, CSS, and JavaScript to create dynamic and responsive web experiences.
- Ensure seamless functionality and user interaction by implementing best practices in web development.
- Design and implement MySQL databases to efficiently manage application data.
- Implement RESTful and SOAP web services to facilitate data exchange between different systems.
- Integrate external APIs and services to enrich application functionality and enhance user experience.
- Identify and address software defects, performance bottlenecks, and compatibility issues.

Technologies: PHP, MySQL, HTML, CSS, jQuery, .Net

HACKATHONS

Honourable Mention Awardee

Govhack Australia - 2023-09-29

Developed TenancyIQ which won Honourable Mention Award from the NSW Government under the category of Cost of Living Pressure NSW which was a 24-hour hackathon event.

Github Repo: <https://github.com/ArjunAranetaCodes/TenancyIQ>

Demo: <https://www.youtube.com/watch?v=2rNuaUO3HAQ>

Duties:

- Understand the given APIs and data from the Cost of Living Pressure category.
- Analyze data from APIs and data sheets.
- Develop a React application based on the proposed design.
- Deliver the project together with a video showing the application

Technologies: React, NodeJS, APIs, Midjourney
